Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Prosecution Reopened

Prosecution on the merits of this application is reopened on claims 2-12, which are considered unpatentable for the reasons indicated below.

Applicant is advised that the Notice of Allowance mailed May 24, 2005 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 2-4, 6-9, 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Fleener et al. (U.S. Patent No. 6,908,427).

In regard to claims 2-4, 6-9 and 11, Fleener et al. teach an end cap 40 for an endoscope 100 where the end cap 40 is a substantially hollow member that provides an open or working space in front of the insertion or distal end 108 of the endoscope 100 (see Figure 1). The end cap 40 also includes a patient tissue access port 60 that allows

a medical device associated with the endoscope 10 to access patient tissue disposed relative to the outside surface of the end cap 40 (see col. 8, lines 38-41). Figures 5a-5c show a suturing apparatus 10 positioned within the endoscope 10 where suturing apparatus 10 may be advanced/retracted within a field of view (see col. 9, lines 1-12). The suturing device 10 contains a piercing tip 14 and a needle assembly 12 (see Figure 5c). An alternate embodiment of end cap 40 where one of the ports 110a-c of the endoscope 100 selectively provides suction that pulls a portion of the tissue 80 into the tissue access port 60 where it is pierced by a needle 16 (see Figures 4a and 4b and col. 10, lines 13-26). **In regard to claim 12**, see col. 9, lines 21-63.

Allowable Subject Matter

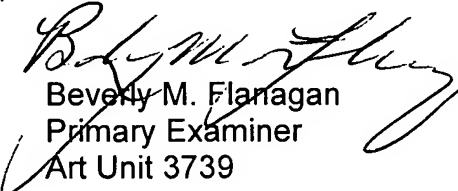

Claims 5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
